'U' • Upper bleaching tray

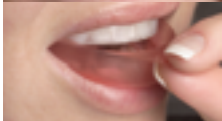

'L' • Lower bleaching tray

Center tray on arch

Lightly press into place

Remove outer tray

Lightly adapt inner tray

Wear for 30-60 minutes per day. When finished remove bleaching tray and brush teeth

Precautions:

1. Keep tooth bleaching product away from small children
2. A dental examination is recommended prior to bleaching. Some discolorations may indicate the need for dental treatment other than bleaching. Porcelain crowns, veneers, and white fillings do not lighten upon bleaching.
3. Only intended for use by those with healthy gum tissue. Gum tissue irritation may result if used in individuals with periodontal disease
4. This product is NOT for nighttime use.
5. Occasionally, some parts of teeth may bleach faster or less evenly than others. Results may be varied. In approximately 5% of the population, teeth may be resistant to bleaching. BLEACHING TEETH WITH LARGE METAL FILLINGS MAY CAUSE THE METAL COLOR TO SHOW THROUGH THE TEETH.
6. Acidic foods/juices may cause sensitivity if consumed shortly after bleaching.
7. Do not use tobacco products or eat while bleaching.
8. Not intended for use by pregnant women.
9. Keep gel out of heat/sunlight. Do not freeze.

WARNING: Some users may experience sensitivity, which if it occurs is most often mild and transient, but in some cases may require treatment by your dentist. If you experience significant discomfort, stop using this product and consult your dentist. If you have any questions about this product or treatment, please ask your dentist.
